INDEX OF ABSTRACTS

Volume 18 (1971)

ABBOTT, H. L., and SURYANARAYANA, D. Quasi-perfect numbers, 933.
ABE, Kinetsu. On Kählerian submanifolds in $\mathbb{C}^N$. Preliminary report, 820.
ABERTH, Oliver G. A nonexistence theorem of differential equations, 89.
ABHYANKAR, Shreeram S. Epimorphisms of polynomial rings, 359.
ABHYANKAR, Shreeram S., and HEINZER, William J. Uniqueness of the coefficient ring in a polynomial ring, 359.
ABIAN, Alexander. The common points of families of normal functions, 663; Mitotic ordinals and their applications, 827; Order in rings, 943.
ACCOLA, Robert D. M. Vanishing properties of theta functions for abelian covers of Riemann surfaces. I, 407; The local p - 2 conjecture for genus five. Preliminary report, 513; Vanishing properties of theta functions for abelian covers of Riemann surfaces. II. Preliminary report, 553.
ADAMS, John Conway. G-rings and some of their properties, 629.
ADAMS, Michael E. A countable rigid pseudocomplemented distributive lattice, 627.
ADDIS, David F. See McAULEY, Louis F.
AGARD, Stephen B. Quasiconformal mappings and the moduli of p-dimensional surface families, 1084.
AGARWAL, Arun Kumar. On the maximum modulus and the mean value of an entire function of two complex variables, 772.
AHARONOV, Dov, and KIRWAN, William E. A method of symmetrization and applications, 144.
AHERN, Patrick R. Inner functions in the polydisc, 1084.
AHLSWEDE, Rudolf. Solution of Shannon's zero-error capacity problem for polygons. Preliminary report, 944.
AHMAD, Shair, and LAZER, Alan C. Periodic solutions of forced conservative systems, 651.
AKCOGLU, Mustafa A., and SUCHESTON, Louis. On operator convergence in Hilbert space and in Lebesgue space, 417.
ALAS, Ofelia T. Topological groups and uniform continuity, 431; Semifields and positive linear functionals, 678.
ALBEVERIO, Sergio. On bound states in the continuum of N-body systems and the virial theorem, 241.
ALEXANDER, Charles C. A metrization theorem, 786.
ALEXANDER, Herbert J. On polynomial hulls, 1081.
ALEXANDER, Ralph, and STOLARSKY, Kenneth B. On the sum of distances between points on a sphere. Preliminary report, 562.
ALLEN, Dennis P., Jr. A generalization of the Rees theorem to a class of regular semigroups, 130.
ALLEN, Richard C., Jr., MUNDORFF, P., WING, G. Milton, and BURGMEIER, James W. A numerical algorithm suggested by problems of transport in periodic media: the matrix case, 234.
ALO, Richard A. See de KORVIN, Andre.
ALO, Richard A., SHAPIRO, Harvey L., and SMITH, Frank A. Disconnected spaces and strong normality conditions, 207.
ALO, Richard A., SHAPIRO, Harvey L., and WEIR, Maurice D. Realcompactness and Wallman real-compactifications, 546.
ALTER, Ronald, and VILLARINO, Mark B. A remark on primes in arithmetic progressions, 85.
ALTON, Donald Alvin, and MADISON, Eugene W. Computability of Boolean algebras and their extensions, 970.
AMANN, Herbert. Existence theorems for Hammerstein equations, 194.
AMBERG, Bernhard. Infinite groups which are the product of two abelian subgroups, 130.
AMELIN, Charles F. A stability of index theorem for operators on Frechet spaces. Preliminary report, 751.
AN, Chungming. On the analytic continuation of certain Dirichlet series, 525.
ANDERSON, Bruce A. Finite topologies and Hamiltonian paths. Preliminary report, 979.
ANDERSON, Clifford H. A differential-difference equation leads to a generalized Fourier-Dirichlet representation of the forcing function, 158.
ANDERSON, Edmund H. Self-universal crumpled cubes and a dogbone space, 929.
ANDERSON, Joel H. Commutators and the essential numerical range, 195.
ANDERSON, Robert V. See DeCICCO, John.
ANDERSON, William N., Jr., DUFFIN, Richard J., and TRAPP, G. E. Incidence matrix concepts for the analysis of the interconnection of networks, 792.
ANSON, Dennis. The structure of totally ordered sets. Preliminary report, 1072.
ANTON, Howard, and DURIS, Charles S. An algorithm for obtaining best approximate solutions to Av = b in normed linear spaces, 186.
APPEL, Kenneth I. The word problem for tame alternating knot groups is solvable, 942.
APPLEBAUM, Charles H. A result for pi-groups, 423.
APPLING, William D. L. Integrability and a class of continuous functions, 644; A further remark on the Bochner-Radon-Nikodym theorem, 817; A note on a class of linear transformations. Preliminary report, 949; Finite additivity and distribution functions, 1105.
ARCHAMBAULT, Claire. See BENAC, Theodore J.
ARGABRIGHT, Loren N., and GIL de LAMADRID, Jesus. Weakly almost periodic measures. Preliminary report, 506.
ARKIN, Joseph. Convergence of the coefficients in the kth power of a power series, 608.
ARMBRUST, Manfred. On elementary equivalence of ω-pseudo-complete Hensel fields, 106.
ARNOLD, Jimmy T. On Krull dimension in power series rings, 109; Power series rings over Prüfer domains, 1040.
ARNOLD, Jimmy T., and BREWER, James W. Essential valuation overrings of D[[X]]. Preliminary report, 354.
ARON, Richard M. The bornological topology for the space of holomorphic mappings, 638; Holomorphy types for open subsets of a Banach space, 813.
ARONSZAJN, Nachman, and SZEPTYCKI, Pawel. Bessel potentials on subcartesian spaces, 153.
ARORA, K. L. Finite flexure of an initially curved cuboid under nonuniform temperature distribution, 239; Flexure of an initially curved cuboid dielectric, 791.
ARSOVE, Maynard G., and LEUTWILER, Heinz. Quasibounded and singular functions, 367; Projections onto spaces of quasibounded and singular functions,

519; A class of potentialtheoretic operators, 927.
ARTZY, Rafael. Loop laws and collineations of planes, 199.
ARYA, Shashi Prabha. See RANI, Asha.
---. See SINGAL, M. K.
ASH, Christopher J. Undecidable $\aleph_0$-categorical theories, 423.
ASKEY, Richard A. Summability of Jacobi series, 1082.
ASSAD, Nadim A. Fixed point theorems for set valued transformations on compact sets, 382; A fixed point theorem for weakly uniformly strict contractions. Preliminary report, 675.
ASSAD, Nadim A., and KIRK, William A. Fixed point theorems for set-valued transformations of contractive type. Preliminary report, 407.
ATALLA, Robert E. P-sets and F-spaces, 839.
ATKINS, John M. A characterization of Σ and M* spaces. Preliminary report, 1111.
ATKINSON, Kendall E. The numerical solution of an Abel integral equation by product integration. 655.
AULL, Charles E. The oldest separation axiom, 438; Quasi-developable and weak σ-spaces. Preliminary report, 1065.
AULT, Janet Elizabeth. Regular semigroups which are ideal extensions of groups, 132.
AUPETIT, Bernard H. Almost commutative Banach algebras, 191; Symmetric almost commutative Banach algebras, 559; Continuity of the spectrum in Banach algebras with involution. Preliminary report, 638.
AWTAR, Ram. On the commutativity of nonassociative rings, 942.
BAARTMANS, Alphonse H. Solvable groups with abelian Carter subgroups. Preliminary report, 768.
BABUŠKA, Ivo. Approximation by hill functions. Preliminary report, 379.
BACHELIS, Gregory F., and GILBERT, John E. Banach spaces of compact multipliers and their dual spaces, 173.
BAERNSTEIN, Albert II. Proof of Edrei's spread conjecture, 1077.
BAGBY, Richard J. A difference quotient norm for spaces of quasi-homogeneous Bessel potentials, 138.
BAILDON, John D. Euler characteristics of 2-manifolds and light open maps. Preliminary report, 784; Open simple maps and periodic homeomorphisms. Preliminary report, 840.
BAILES, Gordon L., Jr. Right inverse semigroups, 1043.

MEETINGS OF THE AMS
Abstracts of Contributed Papers, 85, 354, 505, 608, 751, 922, 1038
Calendar of Meetings, 2, 306, 466, 578
Preliminary Announcements
March: Chicago, Illinois, 53
April: New York, New York 56, 320
Monterey, California, 321
June: Corvallis, Oregon, 483
August: University Park, Pennsylvania, 484, 583
October: Cambridge, Massachusetts, 715
November: Auburn, Alabama, 715, 853
Milwaukee, Wisconsin, 717, 855
December: Philadelphia, Pennsylvania, 859
January: Las Vegas, Nevada, 857, 1011
